

AI Strategy Roadmap 2026

Objective

Adopt a scalable AI orchestration framework capable of supporting:

- Multi-agent workflows
- Human-in-the-loop review
- Long-term memory
- Enterprise integrations
- Internal document search

Requirements

High Priority

- Open-source preferred
- Python support mandatory
- Auditability required
- Cloud deployment ready
- Role-based access control

Medium Priority

- Visual workflow support
- Low-code capabilities
- Analytics dashboards

Success Metrics

- 30% reduction in manual analysis effort
- 25% faster report generation
- 90% user satisfaction score
